

# Creating an article dashboard

I've always been interested in how to build an article toolbar to make it easier to interact with the content we make available. Then I saw the toolbar for HBR articles, shown below:

Figure 1:  
Harvard  
Business  
Review  
Article  
Toolbar

Rather than just copy the features from HBR I'm thinking about the following feature set

- View/Download a PDF version of the document
- Increase / decrease the text size

We'll explore each of these ideas in turn

## View/Download a PDF version of the document

## Increase / decrease the text size

## Save the PDF file in Dropbox
