

Feedback

Overall feedback:

- How are you defining low-code?
- Does this include editing `theme.json`?
 - If so it should be listed somewhere
 - This is the same feedback I got when creating the `theme.json` lesson plan

Module 1: Recap of Create a Block Theme (Low-Code)

- Review theme requirements
- Review templates
- Review template parts

Module 2: Saving Site Editor Changes to the Database

- What happens when saving Style changes to the database?
- What happens when creating and saving templates and template parts to the database?
- What happens when exporting the saved theme using Site Editor or Create Block theme?

Module 3: Creating Custom Templates and Template Parts

- How to create a custom template
- How to export the saved content to template or template part file
- How to manually include template parts inside a template

Module 4: Custom Fonts

- How to add custom fonts to the theme

Module 5: Theme Patterns

- An Introduction to Block Patterns
- Using Block Patterns in your Block Theme

Module 6: Global Styles variations

- An Introduction to Global Styles variations
- How to Create and Register a Global Styles variation

Module 7: Internationalization

- Internationalization in Block Themes
- How to use Block patterns to enable internationalization
